The cost of classes is **less than one-to-one tuition** and provides a different but valuable and stimulating environment where the child is able to engage with their peers and learn in a group context.

We provide a differentiated workbook which includes practice papers and example questions focusing on the **EDEXCEL syllabus**. Problems may be brought to the lesson, and the emphasis will be on examination technique, and strategies in how to gain those extra vital marks.

A full course breakdown and objectives for each lesson can be downloaded from our website.

Further courses will be publicised on our website.
